RailConnect™ 360–a GE Predictivity™ solution

**Boost productivity**

# RailConnect™ TMS

## Get proactive information that powers new levels of productivity.

Information is power—and the key to efficiency. From yard, inventory and waybill control, to train movement and switching, to demurrage and miscellaneous billing, the more you know about your railroad, the better—and more efficiently—you can manage it.

A core operating and communications system, **RailConnect Transportation Management System (TMS)** automates all aspects of train and switching operations and provides high visibility over all rail assets, communicating information proactively and empowering you to better plan workflow, generate work orders, measure performance and improve customer service.

**The result?** Reduced manual errors. Maximized productivity. Lower costs. And a better customer experience on every level.

### CORE CAPABILITIES

- Builds railcar and train-trip schedules and measures actual performance against the plan
- Generates work orders for train crews based on railroad transportation plans
- Allows train crews to update work in real time via mobile devices
- Tracks customer equipment orders and manages all aspects of railcar billing
- Facilitates the seamless interchange of rail traffic between multiple railroads

### DIFFERENTIATING FEATURES

- Car and Train Schedules (CATS)
- Comprehensive set of automation tools for revenue and transportation
- Platform agnostic—can run on any HTML5-compatible browser on any device
- Industry-compliant and manages over 8 million carloads annually

### OPTIMIZED OUTCOMES

- Drives bottom-line productivity by reducing routine manual efforts, paperwork and data entry
- Automates most common rail events
- Increases visibility of railcars anywhere on the railroad
